The Sensational Hardy Climbing Rose—Climbing American Beauty.

Climbing American Beauty Climbing American Beauty, a new Rose of wonderful beauty and merit, is a cross between the world famous cut-flower Rose, American Beauty, and an unnamed seedling. It is perfectly hardy, strong growing, making canes form ten to fifteen feet in a season, a perfect mass of bloom in June and produces flowers occasionally all through the growing season. The foliage is large, bright, glossy green, and never shows signs of any of the diseases that affect Roses. The color is a soft, glowing red, identical with its pollen parent, the American Beauty; and with the same exquisite fragrance, a quality not found in all climbing Roses. The flowers are of a size three to four inches in diameter, finely formed on long stems, and are produced in great profusion. Success beyond expectations has been found in producing a climbing Rose of the same color, size of flower and fragrance of its pollen parent, the American Beauty with the addition of better foliage and blooming qualities; one plant producing twenty times as many flowers in June as the American Beauty bush rose. Nice 2½-inch pot plants \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1,000. Strong 4-inch pot plants \$4.00 per dozen; \$30.00 per 100.

One plant of this new Rose will produce 20 times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms 3 to 4 inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection." We feel sure this Rose has a great future. Price, \$1.25 per dozen; \$8.00 per 100. Strong two-year plants, \$4.00 per dozen; \$25.00 per 100.

McGREGOR'S

FALL TRADE LIST 1920

HYDRANGEA, ARBORESCEAS GRANDIFLORA ALBA ("Hills of Snow.")—This magnificent hardy American shrub is the very finest addition to this class of plants found in many a year. The blooms are of the very largest size, of pure snow-white color, and the foliage is finely finished, lacking entirely the coarseness found in H. Paniculata Grandiflora. One of its most valuable characteristics is its coming into bloom just after the passing of all the early spring shrubs, while its long season of bloom, from early June through August, renders it doubly valuable, not only to florists, but to every owner of a garden; perfectly bardy, standing 20 degrees below zero. The form of the panicle is much like that of Hyd. Hortensia; the habit of the plant is excellent; it is bound to become the most widely grown and the most useful of all the Hydrangeas, and the most valuable shrub found in the American garden, and florists are learning its value both indoors and out; for summer weddings, for sprays, and for made-up work it is indispensable, for it is pure white and of very dainty finish. Nice, young, well-established stock from 2½-inch pots, \$1.00 per dozen; \$7.00 per 100; \$65.00 per 1,000. One-year field-grown, 10 to 12 inches, \$1.25 per dozen; \$10.00 per 100; \$90.00 per 1,000. Two-year field-grown stock, \$4.50 per dozen; \$37.00 per 100.
